

# AWP06

Waterproof Ceiling Speaker

## AUDAC

### ► Features

- Small, discrete ceiling speaker
- Easy mounting with flip-springs
- High-fidelity music reproduction
- Low distortion
- 3 Way power tapping
- Strong waterproof ABS housing
- Meets the IP65 standard
- 50cm connection cable

### ► Applications

- Indoor
- Outdoor
- Bathrooms
- Swimming pools
- Wellness centers
- Terrace

The AWP06 ceiling speaker was specially designed to provide high-quality sound in a wide variety of in- and outdoor applications.

With a diameter of only 140mm, this speaker has a prominent discreet position on the ceiling

Its wide range, smooth frequency response and high efficiency ensure high-fidelity music reproduction and intelligible speech with a very low level of distortion.

The loudspeaker cabinet is made of a rugged, white ABS material and high quality humidity sealings. The result of this is that the speaker cabinet has also a strong watertight quality that meets the IP65 standard.

Two strong springs on each side of the speaker cabinet provide an easy placement, a secure holding and an easy service access of the speaker in the ceiling.

The AWP06 ceiling speaker is not only a typical 8 Ohm/6Watt speaker solution, it can also be used in 100 Volts PA systems where an internal power tapping of 6, 3 or 1,5 Watt is given.

This speaker is standard equipped with a 60cm connection cable.

### ► Specifications

SYSTEM SPECIFICATIONS	
Max. power	10 W
RMS power	6 W
Frequency response -3dB	100 Hz - 15 kHz
Sound pressure 1 W / 1m	87 dB
Sound pressure max W / 1m	95 dB
Line transformer power tapings	6 W / 1666 Ohm 3 W / 3333 Ohm 1,5 W / 6666 Ohm
Impedance	8 Ohm
IP Rating	65
PRODUCT FEATURES	
Dimensions (Height x Diameter)	Ø 140 x 130 mm
Built-in depth	130 mm
Cut-out measurement	Ø 125 mm
Weight net	0.95 Kg
Driver	4"
Construction	ABS material (waterproof)
