The CLS series are standard powerful column speakers with a slim design, perfectly suitable for a wide variation of indoor applications where audibility of music and speech is very important.

The CLS420 features a speaker unit consisting of 4 x 3" drivers, capable of producing a power up to 20 Watt RMS.

The advanced technology gives the effect of listening to a single sound source, with the same dimensions of the total speaker unit. This guarantees a wide sound dispersion and improved speech intelligibility in acoustically difficult venues.

Some typical applications of column speakers are: houses of worship, auditoria, sports facilities, conference facilities, meeting rooms, public buildings, educational facilities, ...

It is fitted with a 100V line transformer with power taps for 20W and 10W.

The speaker housing is made of sturdy aluminium coated in a white color, offering a timeless design which will be appreciated in any interior.

For the mounting of the CLS420, a special bracket is included, which makes it possible to focus the speaker.
